

Bat Cave

by: Liliane Lortie
Technician, Mammalogy
Royal Ontario Museum

[Animated ROM logo appears with sound sting]

[Liliane is standing at the entrance to the Bat Cave. People talking in background as she speaks]

Hello. Here is Bat Cave. I want you to know about bats. Most bats are not the same. There are many different families of bats. They have different colours, different sizes—small, large, black, red or white, brown. So here is a bat cave; it was built a few years ago. And I want you to see bats here in cave. Come on, join me!

[Scene moves to detail of bat mount. Sounds of bats flying, squeaking and squawking. Liliane is now standing inside the Bat Cave. Sounds of water dripping in background as Liliane speaks]

Wow. This is really interesting; there are plenty of bats hanging on the ceiling. Please, come and show you up there. There are lots of bats, sleeping, hanging on the ceiling. Look at the view.

[Scene moves to view of bat mounts on ceiling then back to Liliane. Sounds of water dripping in background continue as Liliane speaks]

Umm, that's how I learned more about bats. When I was a little girl at school there was one bat flying into the classroom. Everyone was scared. I looked at bat, I thought something strange animal, mouse or something. Teacher said "That's bat". I didn't know. And that's how I grow up to like bats.

I wish to be Bat woman, but can't *[giggles]*

[Video ends with animated ROM logo and sound sting]
