ROM

FALL • WINTER • SPRING

ELEMENTARY
SCHOOL VISITS PROGRAM

Using our world-class galleries, authentic artifacts and specimens, ROM teachers use inquiry-based teaching methods to inspire students and encourage a meaningful and stimulating learning experience.

School visit programs at the ROM come in many forms, allowing the greatest flexibility with time and budget to select a lesson best suited to your needs. Offer your students an incredible opportunity to experience a variety of school visit lessons that enhance curriculum and provide opportunities to engage with authentic specimens and historical artifacts. Plus, all ROM conducted school visit programs include complementary Self-Guided General Admission access before or after your program!

CONDUCTED PROGRAMS

A premier learning experience, a ROM-Conducted School Program is integrated with the Ontario curriculum and gives students a unique opportunity for hands-on learning with artifacts and specimens in our world class galleries and interactive classrooms.
90 minutes, $16/participant

MOBILE PLANETARIUM PROGRAMS

Your class can handle meteorites and other hands-on materials, learn how to read a star map or take a tour of a spectacular star-filled sky inside our mobile planetarium. **90 minutes, $16/participant**

SPECIAL EXHIBITION TOURS

- MESOPOTAMIA: Inventing Our World (until January 5, 2014)

60 minutes, $12/participant

SELF-GUIDED VISITS

Tailor your school visit to meet your requirements. Self-guided visits allow students of all ages to explore the Museum and learn and grow in a rich and inspiring environment under the supervision of staff and volunteers from your school.
$8/participant

VIRTUAL VISITS

Go to the ROM without leaving your school! Through the ROM's Virtual Visit program, your class will have an hour-long live interactive lesson with a Museum teacher. Featuring objects from our collections, each lesson draws on the same curriculum-rich content as our on-site programs. **$60/class**
