(GRADES 9-10)

CONDUCTED SCHOOL PROGRAMS

WHAT ROM SCHOOL VISITS PROGRAMS ARE ALL ABOUT

Using our world-class galleries, authentic artifacts and specimens, ROM teachers use inquiry-based teaching methods to inspire students and encourage a meaningful and stimulating learning experience.

CONDUCTED SECONDARY SCHOOL PROGRAMS

ROM Conducted School Programs are integrated with the Ontario curriculum, allowing students to build critical thinking skills and acquire content, and connecting teachers with relevant and significant resources that meet curriculum expectations.

Weekdays from 10 am | 90 min | \$16 per participant

THE ARTS

GRADE 9&10

Art of the Ancient World (AV110) ♣

Examine and identify the characteristic styles of artwork from Ancient Egypt, Greece and Rome. Students learn how the Elements and Principles of Design serve to enhance the form and function of the art.

Ancient Greek Art (AV110) ♣

Focus on the artwork of the Ancient Greeks. Students learn how the Elements and Principle of Design serve to enhance the form and function of the art as it evolved from the second millennium B.C.E. to the Hellenistic period.

Music Through Cultures and Ages (AMU10, AM20, AMU3M, AMU30, AMU4M, AMU4E)

Enhance understanding of the values of music in different times and cultures. Students will examine how cultures express identity through music, as well as learn about other functions music serves in various societies.

Ancient to Medieval Art (AV120) ♣

Survey the Egyptian and Greek galleries and then focus on the Mediaeval collections. Students identify the roots and characteristics of Romanesque, Gothic and Byzantine art and architecture. They will also interpret messages that are expressed by the artwork and discuss how those messages are conveyed.

HISTORY: CANADIAN & WORLD STUDIES

GRADE 9 & 10

Exploring Canada's History: A Digital Gallery Experience (CHC2D) (CHC2P)

Learn about how this country's culture, history and identity was shaped by the interactions of peoples from many different ethnic backgrounds. Students are introduced to digitized artifacts, dating from pre-contact to present-day while they view a multi-screen presentation and use workstations.

GRADE 10

Canadian History Since World War I 🍀 (CHC2D) (CHC2P)

Explore the forces that have shaped Canada's national identity from World War I to the present through ROM's artifacts. Students investigate the challenges presented by economic, social, and technological changes and explore the contributions of individuals and groups to Canadian culture and society as expressed by the objects.

NATIVE STUDIES

GRADE 9 & 10

Native Studies 🍀

(NDA3M) (NBV3C) (NBV3E) (NDG4M)

Investigate themes such as beliefs, values and aspirations of Canada's First Peoples as expressed by artifacts, artworks and exhibits.

During this lesson, students will increase their awareness and understanding of the history, cultures, world views, and contributions of Aboriginal peoples.

SCIENCE & TECHNOLOGY

GRADE 9

Discover Astronomy (SNC1D/1P)

Investigate the characteristics and properties of a variety of celestial objects visible from Earth in the night sky. Handle 4.5 billion-year-old meteorites, learn how to read a star map, and take a tour of a spectacular star-filled seasonal sky inside a mobile planetarium.

Sustainable Ecosystems: Biology (SNC1D/1P)

Observe arctic, grasslands, and other ecosystems, and visit a living coral reef in order to highlight that sustainability of ecosystems depends on balanced interactions between their components. Consider the causes and consequences of deforestation, climate change and invasive species in the natural world.

The Universe (SNC1D/1P)

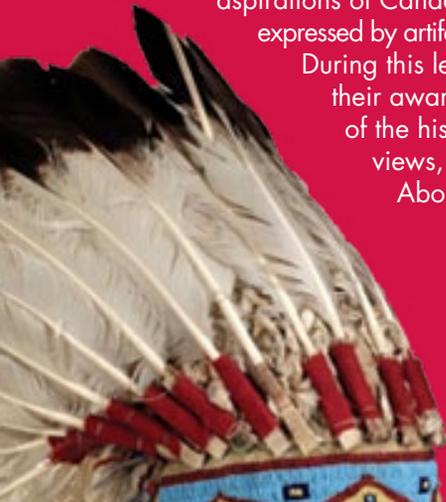

Investigate the major components of the solar system and the universe. In the planetarium a wonderful night sky is shown to contain amazing objects and structures from exploding stars to galaxies. Discover scientific theories about the structure, formation, and evolution of the universe.

GRADE 9 & 10

Climate Change: Earth and Space Science (SNC2D/2P)

Explore prehistoric and modern ecosystems to reveal the causes of natural and human-induced climate change. Investigate various natural and human factors that influence Earth's climate, living things and natural systems. Analyse effects of human activity on climate change.

See our website for a complete list of topics in English & French.

SOCIAL SCIENCE & THE HUMANITIES

GRADE 9&10

Myths and Legends

In this class, a ROM teacher uses the museum's art, archaeology and natural history galleries to show the ways in which myths and legends from many cultures have helped humans to understand our world and each other.

CLASSICAL STUDIES & LANGUAGE

GRADE 9&10

Rome for Latin Students (LVLBU / LVLBU / LVLAD)

Studying artifacts from Ancient Rome and its provinces help students understand the breadth of Roman civilization and Rome's ability to absorb and transmute other cultures.

ENGLISH LITERATURE

GRADE 9&10

Shakespeare's England

Root an understanding of Shakespeare's plays in a sense of Tudor material culture and the social and political issues of the time. Hands-on lab and gallery tour can be tailored to the play you are studying.

GENERAL INTEREST

GRADE 9&10

Exploring the ROM

Students will explore the ROM's diverse collections, including Ancient Civilizations, Arms and Armour, and the diversity of the natural world. This is the best way to introduce the ROM to students who have never been here and it gives them a taste of all the Museum has to offer.

The Iconic Experience

This tour emphasizes ten of the museum's world class objects, introducing students to our most spectacular scientific specimens and impressive ancient artifacts. \$12 per participant

Self-Guided Visits

Tailor your school visit to meet your requirements. The self-guided program allows students to explore the museum in small groups under the supervision of staff and volunteers from your school. \$8 per participant

 Programs available in French
