

ROM School Visits are unforgettable experiences that spark enormous curiosity and inspire learning in students. Enthralling natural specimens and cultural treasures ignite young imaginations through hands-on, active learning. Through our world-class collections and special exhibitions, our programs encourage students to inquire and think critically about the world around them.

FUN Active, multi-sensory learning

RELEVANT Linked to curriculum

GREAT VALUE Stimulating hands-on experiences

RESPONSIVE Cross-curricular and STEAM-based programs

EASY Steps away from public transit and bus parking

WHICH WAY WILL YOU ROM?

- Guided tours of our galleries
- Touch real objects in our labs
- Brand new ROM Makerspace
- Self-guided visits to explore at your own pace
- Rent a Travelling EduKit
- Online activities and resources on the ROM Learning Portal

NEW ROM MAKERSPACE

A digitally-enhanced creative learning studio featuring maker activities and programs.

GUIDED VISITS

90-120 minutes, \$16-\$18/participant
Led by ROM Teachers, examine art, culture, and nature in our galleries, touch real objects in our labs, or engage in a maker activity.

SELF-GUIDED VISITS

\$8/participant

Explore the ROM's world-class collections at your own pace. Gallery Trails and app-based tours are available for download on the ROM Learning Portal.

RENT A TRAVELLING EDUKIT

Bring the ROM to your class! Support your teaching with objects and activities for a multi-sensory experience.

TRAVELLING PLANETARIUM

Star-gazing made simple and fun with our inflatable, mobile planetarium.

GRADES 9-12

Canadian & World Studies, Social Sciences & Humanities, Science, First Nations, Métis, & Inuit Studies, The Arts, English, Family Studies, Fashion, Music, Math, Classical Languages.

Visit rom.on.ca/learn for our full list of programs in English and French.

†Certains programmes sont offerts en français.

The ROM Learning Portal is your gateway to activities and resources that support student learning before, during, and after your school visit.

Check out new resources such as *Our Voices, Our Histories*, a timeline of Indigenous and Western perspectives!

FROM THE DEEP A GIANT EMERGES

OUT OF THE DEPTHS

THE BLUE WHALE STORY

In 2014 nine blue whales became trapped in ice off the coast of Newfoundland and died tragically. In a unusual occurrence two washed ashore creating an unprecedented opportunity for research and conservation. In this ROM original exhibition, come face to face with the enormous eighty-foot skeleton of Blue, and discover the mind-blowing biology of blue whales. Find out how the ROM is studying their DNA to unlock some of the mysteries of these large but elusive creatures, and gain insight into what is being done to protect the world's largest animal...ever.
