

## Summary Documents

### How to Use the Audio Guide

#### I. Select the tour language and/or tour version

The ROM Audio tour is set to a default language and tour version, which it will always start in. To change this, press "0" followed by the *Volume+* button. Keep doing this to scroll through the tour language options. Once you have reached your chosen option, press the green *Play* button to start.

Press "5" before you enter the audio tour stop number to select the descriptive audio version of the tour (available in both French and English).

#### II. Plug in a headset

When a headset is required, ensure it is completely plugged into the left hand headset jack. Do not attempt to plug it into any other jack, as this could damage the Audio guide.

#### III. Listen to a commentary

To play an audio message, enter the number of the audio tour stop you would like to hear, the commentary will start after a three-second pause. Alternatively, you can enter the number and press the green button to start the commentary immediately.

- To pause a playing message, press the red button once.
- To resume playing the message, press the green button once.
- To forward or rewind a message press the appropriate buttons on the keypad. It will forward or rewind the message 3 seconds.

If you would like to hear a completed message again, re-enter the audio tour stop number.
