NEW THIS SUMMER

This summer, the ROM welcomes the opening of the greatly anticipated special exhibition *Pompeii: In the Shadow of the Volcano*. 1,935 years ago in southern Italy, the volcano Vesuvius erupted violently, with tremendous force and little warning. Buried under metres of volcanic ash, the once-thriving ancient city of Pompeii suddenly – and completely – vanished from sight, and remained buried for almost 1,700 years! In the exhibition, over 200 treasures excavated from the actual site tell the remarkable story of the daily lives of the people of Pompeii. Summer Club campers will be fascinated to learn about this ancient city "frozen in time"

For current information on special exhibitions and galleries please visit www.rom.on.ca.

Get hands-on experience with the current tools and technologies used in the fields of anthropology, palaeontology, conservation biology, botany, and zoology. The sky is the limit as you consider future discoveries in these exciting fields.

Sculpture Stories Ages 11-14

From ancient monuments to modern abstract design, take a cross-cultural survey of storytelling through sculpture. Put your new understanding to work as you craft unique works of art using stone, wire, clay, and other materials. Experiment with modeling, casting, and carving techniques to bring a favourite Greek myth to life, tell a tale of Egyptian explorers, or convey a Japanese Shinto message of nature's serenity.

Leadership Ages 14-16

Join our Leadership program and improve your confidence, communication skills and ability to work with a team. Real hands-on experience working with children, assistants, and instructors in our Summer Club programs will reinforce exercises in problem solving, motivation and conflict resolution. You'll also get a chance to meet with museum professionals and learn about museum careers. Graduates of this program will be considered for volunteer assistant positions in next year's Summer Club, and other ROMKids programs
